PROFESSIONAL SUMMARY

Java Full Stack Developer and **AWS Certified Developer – Associate** with close to **10 years** of experience in architecting, developing, and deploying enterprise web-based applications. Core expertise in **Java/J2EE**, **Spring Boot**, **Microservices**,**RESTful APIs**, **Hibernate**, **React**, and **Apache Kafka**. Strong domain knowledge in Banking, Asset Management, and E-Commerce platforms. Proven track record in leveraging AI tools for performance optimization, achieving up to **7x performance gains**. Team player with strong problem-solving, communication, and analytical skills.

TECHNICAL SKILLS

</> LANGUAGES

Java (8/11/21) | JavaScript | TypeScript | Python | SQL

FRAMEWORKS & LIBRARIES

Spring Boot | Spring Cloud | Spring Security | Spring Data JPA | Spring Batch | Hibernate | React | Angular | Play/Akka

CLOUD & DEVOPS

AWS (EKS, S3, CloudFront, Route 53) | AWS (Lambda, SNS, SQS, DynamoDB) | Terraform | Docker | Kubernetes | Jenkins | Git

DATA & MESSAGING

Apache Kafka | Oracle | PostgreSQL | Snowflake | Cassandra | Elasticsearch | Redis | Splunk | DynamoDB | GBQ | Firestore

TOOLS & ARCHITECTURE

Microservices | RESTful APIs | Kong API Gateway | CyberArk | Maven | Gradle | SBT | JUnit | Mockito | Drools | Apache POI

WORK EXPERIENCE

Senior Full Stack Developer — Ideam Technologies

April 2025 – Present

Asset Management Portal — Client: Nuveen

- Migrated legacy asset management portal applications to modern Spring Boot and React architecture.
- Leveraged AI to develop Benchmark Reconciliation project in under 3 months, achieving up to **7x performance optimization** by identifying Oracle stored procedure bottlenecks and query optimizations.
- Handled end-to-end application development to deployment, including infrastructure provisioning using AWS EKS, S3, CloudFront, and Terraform.
- Configured Kong API Gateway, CyberArk secrets management, and Splunk monitoring with custom alerts.

Java 21 | Spring Boot | Microservices | React | AWS EKS | S3 | CloudFront | Route 53 | Terraform | Oracle | Splunk | Kong API

Fraud Analytics Platform — Client: TIAA

- Developed Kafka consumers to process fraud analytics data, transforming and storing in Oracle DB.
- Developed reconciliation feature to identify missing data in DB using Splunk API.
- Developed external API call failure retry and email notification service.
- Developed schedulers to clean up data.

Java | Spring Boot | Microservices | Apache Kafka | Oracle DB | Splunk API | RESTful Services

Senior Associate, Platform Level 1 — Publicis Sapient

September 2021 – April 2025

Goldman Sachs Marcus Highline — Quantum Core

- Designed and developed APIs to facilitate efficient data transfer of transactions, incorporating new validations to ensure data integrity.
- Utilized React to develop and maintain user interfaces for the Quantum ETL platform.
- Engineered a notification service for the timely delivery of compliance reports.
- Developed Snowflake queries to proactively identify and address compliance issues.

Java | Spring Boot | Microservices | React | Snowflake | GBQ | Drools | REST API | Gradle

Full Stack Web Developer — EPAM Systems

July 2019 – September 2021

MasterCard Payment Gateway Services

- Developed end-to-end functionality for saving searches and reconciliation feature for orders.
- Was part of Spring and Bootstrap upgrade and improving password validations.

Java | REST API | PostgreSQL | Cassandra | Spring | Microservices | Hibernate | React

Culture of Togetherness

- Designed and developed end-to-end applications from frontend, backend to deployment.
- Integrated EPAM SSO with Spring Security, Kafka, and Jenkins for CI/CD pipeline.

Java | Spring | Apache Kafka | ReactJs | High Charts | Jenkins | PostgreSQL

Microservices Developer — Verizon Sourcing LLC

February 2019 – July 2019

Agent E-Commerce

- Primary work focused on maintaining ecommerce applications and bug fixes in Agent E-commerce portal.

Java 8 | Play/Akka | Microservices | RESTful Services | Redis | Elasticsearch | SBT

Microservices Developer — Tata Consultancy Services

January 2017 – January 2019

Bose Corporation (BOPIS)

- Part of a new team working on designing and developing services from ground-up using Microservices, Spring Boot and AWS.
- Consumed data from Apache Kafka and performed RESTful service calls to other Microservices.
- Configured S3 to send status change alerts to SNS and read data from S3 bucket to store in DynamoDB.

Java 8 | Spring Boot | Microservices | Apache Kafka | AWS | DynamoDB | Docker | RESTful Services

EDUCATION

Bachelor of Technology — Information Technology
CVR College of Engineering • 2016

CERTIFICATIONS & AWARDS

AWS Certified Developer – Associate (2021)

Pat On Back Award — Received twice (2021)
